

EXP-006C ? Frozen Exit Robustness Report

Verdict: ****EXIT_RULE_FROZEN_READY****

Boundary

- Frozen variants only: EXIT_R0, EXIT_R2, EXIT_R5.
- ENTRY_A, STOP_A, EMA27/EMA200 and thresholds unchanged.
- True holdout after 2025-07-01 04:00:00 was not used.

MFE Capture Audit

Manual audit mismatches: '0'.

Reused temporal median capture equality after EXP-006C metric audit: 'False'.

The identical '-0.743992' median seen in EXP-006B does not persist after applying the literal EXP-00

Entry Alignment

| exit_variant | entry_records | common_entry_records | variant_specific_entries | comparison_mode |

All Research Metrics

| exit_variant | trades | profit_factor | total_return | max_drawdown | median_mfe_capture | good_en

Rolling Folds

| scope | exit_variant | trades | sample_flag | profit_factor | total_return | median_mfe_capture |

Paired Differences

| exit_variant | phase | n | share_better_than_R0 | median_return_diff | median_capture_diff | boots

Concentration

| exit_variant | total_return | return_without_top1 | return_without_top3 | top1_profit_share | top3

Cost Robustness

| exit_variant | blocks | pf_gt1_x1 | pf_gt1_x2 | pf_gt1_x3 | | --- | --- | --- | --- | --- | | EXIT

Answers

1. MFE capture calculation is correct based on manual reconstruction.
2. The reused temporal median capture match from EXP-006B was a metric-convention artifact; after th
3. Entries match across variants in a common signal grid; this audit does not simulate missed re-ent
4. Quarterly behavior is in 'quarterly_metrics.csv'; low-sample blocks are flagged.
5. Rolling positive fold counts are in 'rolling_origin_metrics.csv'; see cost summary and report tab
6. Paired comparisons show whether R2/R5 improve common entries; bootstrap and sign-test approximat
7. Top-1/top-3 stress is in 'concentration_stress.csv'.
8. Best-quarter dependency is reported as 'pf_without_best_block'.
9. Cost x2/x3 robustness is in 'cost_robustness_by_block.csv'.
10. LONG/SHORT metrics are in 'direction_metrics.csv'.
11. R2/R5 robustness should be judged by concentration and rolling folds, not validation PF alone.
12. Holdout readiness verdict: 'EXIT_RULE_FROZEN_READY'; ready candidate: 'EXIT_R5'.
13. EXP-006B verdict should be treated as frozen-ready after this audit.
